Why are there 4 frequencies? 87.6 | 87.8 | 87.9 | 88.0

Kiss FM uses a network of ***Low Powered Open Narrowcast*** radio licences. Kiss FM broadcasts on frequencies at the extreme left of the FM dial, 87.6FM, 87.8FM, 87.9FM & 88.0FM. Depending on where you are in relationship to the nearest transmitter you choose the frequency with best reception in your area. The transmitters are located at:

SUBURB & RECEPTION GUIDE

- Balwyn (87.8)
- Chadstone (87.8)
- Epping (87.8)
- Flemington (87.8)

- Wangaratta (87.6)

And also far north Queensland via **Orbit FM's** transmitters in:

- Cairns Suburbs (87.8)
- Cairns City (88.0)

SUBURB & RECEPTION GUIDE

Tuning in tips & reception help

If you are having problems tuning in you can try these steps:

1. Buy either speaker wire or a FM antenna (available from Dick Smith or Tandy for less than \$5.00.) you will need about 2-5 meters.
2. Attached the wire/antennae to your radio aerial.
3. Move the wire around the room until you hear the Kiss FM signal loud & clear.
4. Secure the wire to this location.
 - Try to make sure there are no obstructions, as other electrical equipment or furniture can interfere with reception.
 - An external television antennae pointed from your location to the nearest transmitter site ([see broadcast map](#)), attached to your radio receiver will also improve reception.
 - If your suburb is not listed above use the frequency of the nearest suburb to you.
 - If that doesn't work try 87.8 and point your radio antennae towards Mt Dandenong and raise it as high as you can, this is where the Olinda transmitter is located and as it is the highest of all the transmitters you may be able to pick up Kiss FM clearer this way.

SUBURB & RECEPTION GUIDE

Interference & interruptions

From time to time adverse weather conditions can also affect the reception, sometimes causing power failures at the transmission sites and interruptions to our satellite link up service. These conditions may include:

- severe storms
- high wind conditions
- solar flares
- dense cloud cover

Should any of these conditions occur we will endeavor to repair the damage as soon as possible.

Faults

Please report any Transmitter faults to (03) 9429 1221

Or via email to: admin@kissfm.com.au
